- Pro Tips: List of Refining Prompts To Use

THIS GUIDE WILL HELP YOU GENERATE FULLY UNIQUE, ENGAGING REVIEWS FOR YOUR PRODUCT, ENSURING EVERY REVIEW SOUNDS NATURAL, DISTINCT, AND RELATABLE.

CREATED BY { PROMPT • WORK SMARTER

HELLO!

FOLLOW THESE STEPS TO MAKE SURE THERE'S NO REPETITION ACROSS NAMES, TITLES, OR REVIEW BODIES. THIS WILL HELP BOOST YOUR PRODUCT'S ONLINE REPUTATION AND AUTHENTICITY!

{Summary}

In the prompt you will fill out the following:

Customize Product Information:
Fill in specific details in the brackets, such as your product's name, top features, and any unique usage scenarios.

Specify Customization Options in the Prompt:
Define a balanced rating distribution.

Request a variety of tones, styles, and lengths.

Provide demographic details to ensure reviews sound personalized.

Check for Uniqueness Post-Generation:
After generating reviews, review for uniqueness. You can use tools like Excel to remove any remaining duplicates in names, titles, or review text.

PRO TIPS

REMEMBER, AI IS NOT PERFECT. REFINE YOUR RESULTS!

Take a moment to ensure the best results by following the tips below, if needed. Training your AI to deliver the desired output might require a few tries, but we've done most of the hard work for you! ***You will in most cases have to ask the same question over and over again in most cases to triple check the output.***

#1: To get more specific language or help ChatGPT match the tone you're looking for, upload images or review examples from other brands you admire. This can guide ChatGPT in mimicking the style, length, and vocabulary that will best suit your product's target audience.

#2: You can upload a sample sheet/excel file to have ChatGPT fill in vs. it making it's own.

#3 Keep the same AI chat going so the AI can learn and build off of your past talks about this topic = better results.

#4: To ensure no duplicate info is created, ask the AI to check and remove the duplicated data and also ask some follow up commends to have it fit what it did wrong.

For example to refine results based on any issues the AI gives you:

"Review the file for any duplicate entries or recognizable patterns."
“Check for review body patterns”
"Ensure the data has a varied and diverse selection."
"Verify that you're referencing the provided sources for male and female names."
"Identify and remove any repeated content in the review text."
"Format names as plain text only—remove any numbers or symbols."
"Ensure that titles and all columns are unique, with no repetitions."
"Analyze the frequency of the top 10 names used and check the spacing between them."
"Double-check for repeated names, as there are still some despite prior confirmations."
"If the total count is still below 500, prompt the AI to expand the list."
"Upload the file to the AI and have it run a thorough check for issues, duplicates, and inconsistencies."
"Use actual human names instead of placeholder text, as sufficient data is available."
"Do not include placeholders like 'Name76' or 'Name196.' Please use names from the lists provided."
“Generate the dataset to avoid further indexing issues”
“Remove this data: …. “
“How is it going?”

THIS DOCUMENT AND INFORMATION MAY ONLY BE USED BY THE SINGLE ENTITY THAT PURCHASED IT AND CANNOT BE SHARED.

PROMPT TITLE: Generate 500 Unique, Natural-Sounding Reviews with a Balanced Rating Distribution in CSV Format

THE PROMPT

ONLY CHANGE THE ORANGE BOLDED TEXT BELOW. AFTER FILLING IN THE ORANGE BOLDED TEXT BELOW, COPY & PASTE THE FULL PROMPT INTO CHATGPT

— — —

Please generate **[Number (ex:50]** unique, engaging, and CSV-formatted reviews for the **[Product Name]** with the following specifications:

Output Format: Generate reviews as CSV entries with these columns:

Name: Use unique, realistic reviewer names.

Names to reference: Male Names: https://www.parents.com/top-1000-baby-boy-names-2757618 | Female Names: https://www.parents.com/top-1000-baby-girl-names-2757832

Date: A unique date for each review between **[date range of]**, spread across a plausible timeframe.

Title: A brief unique title that highlights a key positive aspect of the product.

Review: The review text, varied in tone, style, and length.

Star Rating: Distribute the ratings as specified below.

Email: A unique email for each entry (e.g., reviewer1@example.com).

Balanced Star Rating Distribution:

92% 5-Star Reviews: Emphasize high satisfaction, highlighting qualities like [key features, **e.g., smooth texture, durability, or high performance**.

7% 4-Star Reviews: Positive reviews overall, with light improvement suggestions **(e.g., additional options, alternative colors).**
2% 3-Star Reviews: Friendly, constructive feedback focused on minor aspects (avoid any negative tone).

Reviewer Diversity:

Demographics: **Include a realistic mix in terms of gender, age range (e.g., 20-40 years), and style (casual, professional, tech-savvy).**

Use unique names based on common name lists for variety:
Male Names: Top 1000 Baby Boy Names
Female Names: Top 1000 Baby Girl Names

Language and Tone:

Relatable and Conversational: Make each review sound personal, using phrases like **“my go-to choice,” “really impressed,” or “can’t live without it.”**

Variety in Length:

Short (1-2 sentences): Quick comments on a single positive feature.

Medium (2-4 sentences): Describe standout product benefits or features.

Detailed (4-6 sentences): Include personal experiences, specific scenarios, and light suggestions for improvement if relevant.

Real-Life Usage Scenarios: Include varied, relatable scenarios to make reviews sound authentic, such as:

Daily use: “Perfect for everyday needs.”
Special events: “A must-have for important occasions.”
Multi-purpose feedback: “Great for both quick tasks and extended use.”

Unique Fields and Avoiding Repetition:

Titles: Ensure each title is unique and captures a specific positive aspect.

Names and Emails: Use unique names with no repetitions, and format emails for each review (e.g., reviewer1@example.com).

Dates: Assign a unique date to each review and ensure the date range is from **X to X**

After generating, save the output in CSV format with unique entries in each row for easy import or download

———

You will need to check your file and most likely have to play with the AI by telling it to check and remove duplicates and change names to ensure you have unique end results. and Enjoy and please review and let us know how your project turns out w/ a 5 star review please!
